

# **ACTION TO PREVENT FIRE CASES**

- (i) Drives (over and above normal schedules) have been launched to check and rectify loose connections, heater circuits, OHP (over heat protection), OVP(over voltage protection), HRC Fuse etc.
- (ii) Checking of earthing of the coaches during trip schedule.
- (iii) Special Checks on items vulnerable from fire point of view like spillage of oil, wiring etc during maintenance of coaches, wagons and locos.
- (iv) Special attention to pantry cars regarding LPG pipe lines and fitness certificate is being taken from pantry managers in every trip as assurance.
- (v) Required fire extinguishers have been provided in SLRs, AC Coaches and in Locomotives – verified by Officers and Senior Supervisors during inspections.
